Personal profile

Original I come from the UK, but I have been living in Denmark for the last 2 years. This of course means that I am a native English speaker; however, I am currently studying Danish. Having a great passion for IT, especially programming, was the reason I chose to study web development at KEA. Since starting I have been faced with many challenges on both the front end and back end, helping to teach me how to be a full stack developer. In my spare time, I am working towards getting my CompTIA security+ certification and learning other databases such as MongoDB. I enjoy going to the gym, biking, traveling, cooking and reading. I am diligent, self-motivated, problem solver and I always come to work with positive energy.
